EDUCATION

Stanford University

September 2014

Ph.D Physics

GPA 3.78/4.00

Dissertation Title: "Testing Inflationary Cosmology with BICEP2 and The Keck Array."

Dissertation Advisor: Chao-Lin Kuo

University of California, Berkeley

May 2006

Double Major: Bachelor of Arts in Physics and Astrophysics

GPA: 3.79/4.0(Overall), 3.896 (Physics only), 4.0 (Astrophysics), 3.5 (Math)

Distinction in General Scholarship

EXPERIENCE

Postdoctoral Scholar, SLAC National Laboratory / Stanford University

October 2014 - May 2015

- Lead analysis and forecast modeling for BICEP3 experiment. Deployment to the South Pole in January 2015.

Research Assistant, Stanford University

June 2008 - September 2014

- Designed and built the Keck Array, an array 150GHz polarization sensitive receivers with a goal of measuring a signal in the Cosmic Microwave Background (CMB) Radiation that would provide direct evidence for the epoch of Inflation during the first fraction of a second of the Universe. Experience with instrument design, fabrication and calibration, deployment to the South Pole (2010, 2011 & 2012), and subsequent data analysis with large data sets for BICEP2 and the Keck Array.

Teaching Assistant, Stanford University

September 2007 - March 2013

- Led Discussion and Lab groups for Stanford Physics courses
Physics 108: Low Temperature Lab, Physics 23: Electricity and Optics, Physics 22: Mechanics and Heat

"Degree-scale CMB Polarization Measurements from three years of BICEP1 Data" 2013. Barkats et al. The Astrophysical Journal. 783, 3, 67.

"Measurement of CMB Polarization Power Spectra from Two Years of BICEP Data" 2010. Chiang et al. The Astrophysical Journal. 711, 2, 1123.

SKILLS

Languages: MATLAB, Python, HTML/Css, Javascript, IDL, LABVIEW, L^AT_EX, Perl, Bash

Design: Solidworks, Altium

Operating Systems: Mac OS X, Windows, Linux, UNIX
